

# Igor Oluić

## Frontend Developer

I'm a frontend developer focused on keeping my code clean, organized, and optimized. I adapt to new environments and technologies with ease and am comfortable working both independently and in team settings. I strive to contribute effectively and support both the immediate needs and long-term goals of any project.

- JavaScript
- TypeScript
- React
- React Native
- Next
- Gatsby
- REST
- GraphQL
- Redux
- Apollo
- HTML
- CSS
- Chakra UI
- Material UI
- Native Base
- Tailwind

## Tools & Platforms

- Git
- Azure
- Jira
- Figma

## Languages

Serbian

English

## Experience

### July 2022 - Present

8Entity

#### TypeScript / React Native / Next / REST

- Developed a social betting mobile app with features like friend systems, different game modes such as group competition and 1v1, rankings, ads, tutorials etc.
- Created a back office system for managing ads and groups, improving operational efficiency.

#### JavaScript / React / GraphQL

- Developed a comprehensive financial management application that focuses on customer risk profiling, spend analysis, and detailed financial reporting.
- Implemented features for customer risk assessment, enabling accurate evaluation of customer profiles based on spending and transaction data.
- Created dynamic financial overview dashboards to provide users with a high-level summary of key financial metrics and trends.
- Built detailed reporting pages for interchange fees and invoice matching, improving financial transparency and operational efficiency.

### March 2022 - May 2022 (Part-time)

Clubspark

#### TypeScript / React / GraphQL

- Contributed to the completion of the LTA project, focusing on the tennis club membership registration process.
- Offered a full-time position due to quality contributions but opted to pursue other opportunities.

### January 2021 - July 2022

Kortechns

#### JavaScript / React / React Native / REST

- Worked on the Landline booking service, focusing on both web and mobile app development.
- Built and maintained key features for booking and travel management, enhancing user satisfaction.
- Developed a backoffice platform from scratch for agent use, including features like driver statistics and availability management using D3 and custom calendars.

## Freelance Project

### Typescript / Next.js / REST

I am currently leading the development of an application designed for trucking companies. The platform enables users to leave and access detailed driver reviews, providing valuable insights for company owners and HR managers during the hiring process. This system promotes transparency and helps improve the quality of hires within the industry.
